'move' works correctly.	'move' is implemented the right way.

Code Quality

CRITERIA	MEETS SPECIFICATIONS

CRITERIA	MEETS SPECIFICATIONS
Readability	<p>Code quality issues should not make a project non-passing unless they are problematic enough that it is not possible to understand the code at all with a reasonable amount of effort.</p> <p>Readability is important so try to go through your code before submitting to make sure that a reviewer will be able to provide the most helpful feedback for you.</p>
